SUMMARY

Motivated Computer Science student with knowledge of Java, Python, Machine Learning, and Artificial Intelligence concepts along with knowledge of core computer science subjects including Data Structures and Algorithms, Operating Systems, and Computer Networks. Passionate about developing innovative solutions and improving problem-solving skills through real-world projects. A quick learner with good teamwork and communication abilities.

TECHNICAL SKILLS

Languages:	Python, Java, C, C++, SQL
AI/ML:	Machine Learning, LightGBM, Isolation Forest, Scikit-learn, RAG, LLMs
Libraries/Tools:	Pandas, NumPy, Matplotlib, Seaborn, Streamlit, FAISS, Hugging Face, LangChain, Tableau, Power BI
Web Technologies:	HTML5, CSS3, JavaScript, Node.js, Express.js, MongoDB, Tailwind CSS
APIs & Backend:	REST APIs, Socket.IO, Google Gemini API
Developer Tools:	Git, GitHub, Google Colab, VS Code

EXPERIENCE

FlyRank — **July 2026 – Present**

Machine Learning Intern (In Progress) — *Remote*

- Developing and deploying Machine Learning solutions using **Python**, implementing data preprocessing, feature engineering, model training, and evaluation to build scalable predictive models.
- Collaborating with cross-functional teams to optimize model performance and support AI-driven product development.

PROJECTS

Credit Card Fraud Detection System

- Analyzed highly imbalanced financial transaction data using **Python, Pandas,** and **NumPy**, applying preprocessing, feature scaling, and **SMOTE+ENN** to improve data quality for fraud detection.
- Built and compared **LightGBM** and **Isolation Forest** models, evaluating **Accuracy, Precision, Recall, F1-Score, ROC-AUC,** and **Confusion Matrix** across multiple train-test splits.
- Investigated model errors and fraud patterns to assess robustness and reliability for real-world transaction scenarios.
- **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, LightGBM, Isolation Forest, SMOTE+ENN, Matplotlib, Seaborn

Customer Churn Prediction

- Analyzed a real-world telecom dataset using **Python, Pandas, and NumPy**, performing data preprocessing, exploratory data analysis (EDA), and feature engineering to identify patterns associated with customer churn.
- Developed and compared **Logistic Regression, Decision Tree, and Random Forest** models, evaluating their performance using **Accuracy, Precision, Recall, F1-Score, and ROC-AUC**.
- Investigated model predictions and performance across different algorithms to identify the most reliable approach for **customer churn analysis and classification**.
- **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Google Colab

Blood Donation and Emergency Locator

- Developed a full-stack blood donation platform using **Node.js, Express.js, MongoDB,** and **Tailwind CSS** with secure role-based authentication and RESTful APIs.
- Implemented intelligent donor matching based on blood group and PIN code, integrating **Socket.IO** and **Leaflet Maps** for real-time blood request tracking and location-based coordination.
- Built secure admin workflows, middleware authorization, responsive dashboards, and CRUD operations to streamline donor management and improve emergency response efficiency.
- **Tech Stack:** Node.js, Express.js, MongoDB, Mongoose, HTML5, Tailwind CSS, JavaScript, Socket.IO, Leaflet Maps, REST APIs, Render

EDUCATION

RV Institute of Technology and Management, Bengaluru — 2023 – Present

Bachelor of Engineering in Information Science and Engineering — CGPA: 8.68

CERTIFICATIONS

- Digital Productivity with AI – Passport to Earning (YuWaah–UNICEF) **(Score: 100%)**
- Machine Learning for Beginners
- Java In-Depth – Infosys Springboard
- AI Agents – Udemy
- Generative AI Mastermind – OutSkill

ACHIEVEMENTS

- 1st Place – Ideathon 2026 for AI-based human verification system.
- Conducted Tableau workshop on dashboards and analytics.
- Protatva 2025 for Farm2Market direct market access for Farmers.

RESEARCH

AI in Early Detection of Heart Disease — 2026

- Published research in HBRP Journal on explainable AI models for ECG diagnosis.
